Western BCA is on its way to being united again after our most recent election, and I believe we will achieve that unity soon. I have decided to run for the Board of Directors because I strongly believe I have much to offer and can significantly contribute to this unity.

While there has been some concern about my lack of "experience" in an official capacity, I have been involved with Western BCA for the last seven years. During this time, I have met and interacted with hundreds of players through my business activities, and now I would like to represent the players directly. Many of our current board members began without prior WBCA experience in elected positions, yet they have done a fantastic job by bringing together different skill levels and backgrounds to work collaboratively for our organization.

I am confident that my fresh perspective, combined with my deep passion for the game and commitment to the community, will help further our goals and strengthen the unity of Western BCA.

Thank you for your consideration.
